

2017 HYUNDAI

SANTA FE

2017 HYUNDAI SANTA FE

YOUR ANSWER TO “SO, HOW WAS THE WEEKEND?” SHOULD BE EPIC. SOON, IT WILL BE.

With Hyundai Santa Fe, there's no telling what kind of adventures you'll pull off in those 62 precious hours between Friday night and Monday morning. Go ahead and make a to-do list for your family that's long on fun. Santa Fe is engineered with the capability, safety technology and premium comfort features to satisfy your most ambitious plans. If that includes trailering something large and heavy, no problem. Santa Fe gives you a class-leading standard towing capacity of up to 5,000 pounds.¹

Whatever your plans, you can carry them out in style. For 2017, Santa Fe's rugged-yet-elegant Storm Edge design is now even edgier. We've enhanced eye-catching details like the LED lighting front and rear. Available 19" alloy wheels now showcase a new, more athletic stance. And Santa Fe's style is matched by its substance. Advanced new safety systems available on Santa Fe include Lane Departure Warning,² Smart Cruise Control³ and Automatic Emergency Braking with Pedestrian Detection.⁴ After all, you want your epic weekend to end happily.

¹ Claim based on comparison of specifications on manufacturer websites. 5,000-pound towing capacity with trailer brakes. 1,653-pound towing capacity without. ² The Lane Departure Warning operates above approximately 44 mph and only when the lane markings are clearly visible on the road. It will not prevent loss of control. Refer to your Owner's Manual for more information. ³ Smart Cruise Control (SCC) is not a collision avoidance or warning device. SCC is for highway use only and should not be used in poor weather, heavy or varying traffic, or on winding or slippery roads. The driver is responsible for slowing or stopping the vehicle to avoid a collision. ⁴ Automatic Emergency Braking (AEB) is designed to detect vehicles whose taillights are directly in front of the Santa Fe. AEB initiates full braking at speeds between 5-50 mph when detecting other vehicles and 5-43 mph when detecting pedestrians. AEB with Pedestrian Detection detects pedestrians, but not in all conditions. AEB is not a substitute for safe driving. See Owner's Manual for details and limitations.

SANTA FE SPORT 2.0T ULTIMATE TECH PACKAGE in Pearl White

2017 SANTA FE LINEUP

WHICH SANTA FE IS RIGHT FOR YOU? TAKE A HEAD COUNT.

We understand that no two families are alike. That's why we offer Santa Fe in a range of models and seating capacities. Our three-row Santa Fe SE and Santa Fe Limited are built on a longer wheelbase, offering room to carry more passengers and more gear – in more configurations – to whatever games, meets, matches or retreats are on your busy schedule.

The third row is now easier to access, thanks to a 40/20/40 second-row seat with a longer slide range. Access to generous cargo capacity is also a breeze using a hands-free smart power liftgate. Stand within three feet of the vehicle's rear liftgate with the key in your pocket or purse for more than three seconds, and it opens automatically.

The 7-passenger Santa Fe SE lets you buckle three passengers into a second row of seats. The luxurious Santa Fe Limited places a pair of leather-clad captain's chairs in the middle row for a 6-passenger maximum seating capacity. Don't need the third row of seating? Then our 5-passenger Santa Fe Sport might be perfect for you. And isn't that the one-word answer you want to give everyone on Monday? "Perfect."

SANTA FE SPORT 2.0T ULTIMATE TECH PACKAGE in Pearl White

SANTA FE LIMITED ULTIMATE TECH PACKAGE in Gray Leather

HANDS-FREE SMART LIFTGATE WITH AUTO-OPEN

3 SECONDS

The 2017 Hyundai Santa Fe features a power rear liftgate that can recognize when you need it to open with hands-free convenience. Stand within three feet of the vehicle's rear liftgate with the key in your pocket or purse for more than three seconds, and it opens automatically. No kicking your feet to activate it. You can stop the liftgate at various heights, too. Smart indeed.

FOLD-FLAT SECOND AND THIRD-ROW SEATS

80.0 CU. FT.
CARGO

To make the most of your Hyundai Santa Fe's spacious carrying capacity, simply fold the second and third rows of seating. Both rows quickly fold to form a broad, flat surface that can then be used to load up with bulky gear.

¹ Claim based on comparison of specifications on manufacturer websites. ² EPA estimate for Santa Fe SE and Limited models with front-wheel drive is for comparison only. Mileage may vary. Your actual mileage will vary with options, driving conditions, driving habits and the vehicle's condition.

SANTA FE LIMITED ULTIMATE TECH PACKAGE in Circuit Silver

ENGINEERING REFINEMENT

ONE-SIZE-FITS-ALL IS OKAY FOR BASEBALL CAPS. NOT YOUR SUV.

Considering how much time you spend driving, shouldn't you and your vehicle feel like soul mates? Santa Fe features a technology called Drive Mode Select that tailors the engine, transmission and steering response to suit your preference. Choose a mode to satisfy your mood – Eco, Normal or Sport – and Santa Fe precisely alters its performance to that characteristic.

Drive Mode Select syncs with Santa Fe's Active Cornering Control, Hyundai's advanced next-generation All Wheel Drive system. It optimizes traction more intelligently, transferring engine torque to the rear wheels and applying braking force to the inside rear wheel for improved grip and greater cornering capability in turns.

Refinements to the steering system in our 2017 models have also resulted in a feel behind the wheel that's smooth with just the right balance of steering weight, feedback and responsiveness. A few laps around town is all it takes for you and your Santa Fe to start completing each other's sentences.

5,000 LB TOWING CAPACITY

6-SPEED AUTOMATIC

Every Santa Fe engine is mated to Hyundai's 6-speed automatic transmission with SHIFTRONIC® manual shifting that lets you tap-tap-tap your way through the translation of power to pavement. Santa Fe is also equipped with an overdrive lock-up torque converter for higher fuel economy at freeway speeds.

2.0L TURBO SPORT

On Santa Fe Sport, an available 2.0L turbocharged engine uses a twin-scroll turbo to create a broad band of torque where it matters most: In the low- to mid-range of rpm. Engineered to run on regular unleaded gas, the 2.0L turbo engine's advanced design also helps reduce emissions and optimize efficiency at low engine speeds.

TOW UP TO 5,000 POUNDS

Santa Fe's V6 engine generates 290 horsepower and 252 lb-ft of torque – more standard V6 horsepower than Toyota Highlander or Honda Pilot.¹ The standard trailer prep package, complete with a flush-mounted tow hitch design and 5,000 pounds of towing capacity, helps you put all of that power to good use.

V6 MUSCLE

In Santa Fe models, a 3.3L V6 engine provides potent response to your right foot's prodding of the gas pedal. It generates an effortless flow of power and torque with up to 25 MPG highway fuel efficiency² using advancements that include Dual Continuously Variable Valve Timing and Gasoline Direct Injection.

SANTA FE LUXURY

YOUR DAYS ARE HECTIC. SANTA FE MAKES THEM A WHOLE LOT EASIER.

You've got a tight schedule to keep – your own, and everyone else's in your family. So little things like fumbling for your car key with your arms full of groceries can add speed bumps to a busy day. But what if the key stayed in your pocket or purse while unlocking the driver's door of your Santa Fe...and letting you start the engine at the press of a button? What if, when you approached the rear of your Santa Fe with suitcases in both hands, the liftgate opened automatically?

What if, when you sat down to drive your Santa Fe, your seat was quickly heated or cooled to help keep you comfortable? What if your seat fabric was stain-resistant and infused with an antibacterial feature to control odors? Or the air inside the cabin was automatically set to your ideal temperature and cleaned by an ionizer? And what if you had fingertip access to the controls of your smartphone?

Imagine life with a 2017 Hyundai Santa Fe, and see if you don't start smiling inside.

SANTA FE LIMITED ULTIMATE TECH PACKAGE in Black Leather

ADVANCED SAFETY

THERE'S NOTHING STANDARD ABOUT OUR COMMITMENT TO SAFETY.

You've got a responsibility for the safety and security of your family. Which is why we've engineered Santa Fe with innovative safety features inside and out. Like a driver's knee airbag – it's one of seven airbags onboard, giving Santa Fe more standard airbags than the Honda Pilot and Nissan Pathfinder.¹

Our strategy for safer driving starts the moment you back out of your driveway. When reverse gear is selected, Rear Cross-traffic Alert helps warn the driver of vehicles approaching from the side.² Once you're moving forward, Electronic Stability Control (ESC) uses sensors in the steering system and at each wheel to compare where you want to go with where your Santa Fe is heading. If it detects a difference between the two paths, ESC slows the appropriate wheel to redirect your Santa Fe and help keep you on course.³ Learn more about our safety engineering on the facing page and at HyundaiUSA.com.

Claim based on comparison of specifications on manufacturer websites. The Supplemental Restraint System (SRS) is designed to work with the 3-point seatbelt system. The SRS deploys in certain frontal and/or side-impact collisions where significant injury is likely. The SRS is not a substitute for seatbelts, which should be worn at all times. Children under the age of 13 should be restrained securely in the rear seat. NEVER place a rear-facing child seat in the front seat of a vehicle that has a passenger-side airbag. ¹Rear Cross-traffic Alert is active when the vehicle is in reverse gear and backing at a speed less than 8 mph. Never rely exclusively on the Rear Cross-traffic Alert. Always look over your shoulder and use your mirrors to confirm rear clearance. There are limitations to the function, detection, range and clarity of the system. See Owner's Manual to learn more. ²Electronic Stability Control (ESC) cannot control your vehicle's stability under all driving situations. ESC is not a substitute for safe driving practices. No system, no matter how advanced, can overcome physics or correct poor driving. The driver is always responsible for controlling the vehicle and must use caution to avoid loss of control in all driving conditions. Speed, road conditions and driver steering input will affect whether ESC can help prevent loss of control. See Owner's Manual for details. ³Blue Link agents will contact existing emergency service responders. Only use Blue Link and corresponding devices when it is safe to do so. Blue Link Connected Care includes one year of the Blue Link Connected Care Package and requires an active Blue Link subscription. One-year term starts from the new vehicle date of first use and is available for new vehicle purchases and leases based upon terms and conditions on the Blue Link subscription enrollment pages. Cellular and GPS coverage is required. Blue Link is available on most new Hyundai vehicles. Features, specifications, and fees vary by subscription plan and are subject to change. For more on details and limitations, visit HyundaiUSA.com or your authorized Hyundai dealer.

AUTOMATIC
EMERGENCY
BRAKING

SMART
CRUISE
CONTROL

LANE
DEPARTURE
WARNING

BLUE LINK® CONNECTED CARE

Hyundai's innovative Blue Link Connected Care package helps ensure you're not alone in an emergency. Automatic Collision Notification and SOS Emergency Assistance report your position and connect you to an operator in a flash. Connected Care also includes Monthly Vehicle Health Reports and lets you schedule service appointments with authorized Hyundai dealers from the driver's seat.⁴ For more information, visit HyundaiBlueLink.com.

LANE DEPARTURE WARNING

New on the Hyundai Santa Fe for 2017, Lane Departure Warning is an available system that alerts the driver with both an audible and visual cue whenever the vehicle starts to drift outside of its lane without signaling.

SMART CRUISE CONTROL WITH STOP/START

Another innovation on our 2017 models, this feature does far more than ordinary cruise control. Radar is used to maintain a desired speed and distance from vehicles in front of you. When traffic stops, Smart Cruise Control brings you to a full stop automatically, then re-engages if the vehicle ahead moves forward within 3 seconds.

AUTOMATIC EMERGENCY BRAKING WITH PEDESTRIAN DETECTION

This new system utilizes the front radar and a front camera to help warn of a potential collision with a vehicle or pedestrian ahead of you. If the system detects a crash is imminent and the driver does not maneuver to avoid impact, Santa Fe automatically applies emergency braking.

¹ Android Auto is compatible with smartphones powered by Android™ 5.0 or higher. Android Auto, Android, Google and other marks are trademarks of Google, Inc. ² Blue Link subscription service agreement required. Features vary by subscription plan. Blue Link service works using CDMA-based cellular networks in the 50 United States. Blue Link service is not available where there is no cellular coverage, particularly in enclosed or remote areas. Service availability may be affected by signal strength, foliage, weather, topographical conditions (mountains) and nearby structures (tall buildings, tunnels) and other factors. For details and system limitations, visit HyundaiBlueLink.com. ³ All SiriusXM services require a subscription, sold separately by SiriusXM after a 3-month trial subscription. Fees and taxes apply. All fees and programming are subject to change. To cancel, please call 1-866-635-2349. See our Customer Agreement for complete terms at siriusxm.com. Sirius, XM and all related marks and logos are trademarks of Sirius XM Radio Inc. ⁴ Remote Vehicle Start is only available for push-button start equipped vehicles with an automatic transmission. Remote Climate Control is available on properly equipped models with fully automatic temperature control. Remote Stop is only available while the vehicle is in Remote Start mode. Not available on all models.

SANTA FE LIMITED ULTIMATE TECH PACKAGE in Black Leather

BLUE LINK REMOTE ACCESS

Santa Fe's available Remote Start feature can be customized using your smartphone to match driver preferences. Remote Start with Climate Control includes the option to set a 1- to 10-minute engine timer, and the option to select a desired cabin air temperature or activate the windshield defroster. If your plans change after remote-starting your car, you can stop the engine remotely, too.⁴

MULTI-VIEW CAMERA SYSTEM

Using a new split-screen monitor, Santa Fe now offers multiple views of your vehicle when you're backing up. Along with the conventional rear camera view, the monitor also displays an overhead view to help you see the space around you. On the road, the split screen allows you to see two things at once, such as navigation maps and music selections.

INFINITY® 12-SPEAKER PREMIUM AUDIO

Even the most discerning audiophile will be impressed by the deep bass, clear midrange and crisp highs of the available 590-Watt Infinity Logic 7® premium audio system with 12 speakers. It's so vivid, you'll feel like you've got a front-row seat at Carnegie Hall (turn on SiriusXM® Satellite Radio, and you actually will!).³

CLARI-FI YOUR LISTENING PLEASURE

Along with the concert-hall sounds, you'll enjoy the sight of Santa Fe's available 8" audio system display. And the dynamic range of the Infinity audio system enhanced with two new technologies for 2017: QuantumLogic™ Surround Sound and Clari-Fi™ Music Restoration, which analyzes digital audio files during playback and rebuilds much of what was lost in compression.

SMART TECH

TECHNOLOGY THAT MAKES DRIVING MORE ENJOYABLE. NOT TOTALLY OBSOLETE.

Maybe you've heard talk lately about self-driving cars? At Hyundai, we think that, while the technology for self-propelled vehicles may be emerging, you'd still prefer the experience of actually driving yourself. You just want some help with a few things. Like seamlessly integrating your smartphone with your vehicle. Santa Fe offers Android Auto,[™] which is designed to let you safely use your phone, Google Maps,[™] music, messages and select apps with simple voice commands.¹

Hyundai's award-winning Blue Link® Connected Car System comes standard on most Santa Fe models with an array of features that makes your life easier.² You can connect to Blue Link through your smartphone, a web application or your Santa Fe's in-car system. And do things like start your vehicle remotely, locate a destination and find a shortcut, learn about mechanical issues, call for help...and much more. Discover all of the things Blue Link can do at HyundaiBlueLink.com.
